**Subject:** New: National Sediments Enforcement Group

Superfund Sediment Site Colleagues-

The Office of Site Remediation Enforcement (OSRE) is establishing a national group to share information on enforcement issues and approaches relevant/common to CERCLA sediment sites.

The goals of this group are to:

- share experiences across regions,
- further national consistency,
- identify enforcement issues unique to sediment sites that can benefit from a standardized approach, and
- identify and resolve site-specific enforcement issues at early stages.

We are hopeful that regional enforcement people (program and legal) with responsibilities for complex CERCLA sediment sites will be able to participate.

The calls will be second Tuesday at 1 PM ET. The first call will be June 9<sup>th</sup>. Call in number 866-299-3188 / 202.564.4219#

The first call will focus on the recent Fox River decision on divisibility.

9633784

Doug Dixon and Nancy Browne (OSRE) will be coordinating the calls and agendas... please let us know who in your region will be participating and we'll build the mailing and scheduler list. OSRE staff with sediment site responsibilities, as well as OGC/SWERLO and OSWER/OSRTI, will also be participating.

Thank you – we're looking forward to making this a useful hour for everyone.

Nancy and Doug
